Office Action Summary

Art Unit: 1712

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

The claims recite 3 species of segment dividers as follows:

Species I, wherein the segment dividers are frangible scored line markers;

Species II, wherein the segment dividers are edible barriers;

Species III, wherein the segment dividers are inedible separators;

In addition, the claims recite two species of frangible lengthwise divider as follows:

Species A, wherein the lengthwise divider is a deeply scored line;

Species B, wherein the lengthwise divider is a weak edible binder connector;

Applicants is required to elect one species of segment divider and one species of frangible lengthwise divider. Currently, no claim is generic.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1712

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

To expedite prosecution, it is noted that in a cursory review of the preliminary amendments, it has been noted that there is at least one instance of New Matter. In the amendment filed 3/4/02, paper no. 11, the calorie ratio of "55-15-30" appears to be New Matter since, as originally filed, the ratio is 50-15-30.

Any inquiry concerning this communication or from the examiner should be directed to Steven Weinstein whose telephone number is 703 308-0650. The examiner can generally be reached on Monday-Friday from 7:00 a.m. to 3:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on 703 308-3959.
